Lourdes Lessons
Catechetical Resource Program

How to use this Series

On the technical side, this program is designed for the teacher. Navigation is made user-friendly.

- you will have your own login with a personal tracking of completed materials
- lessons can stand alone or be a complete unit.
- each grade level has a list of lessons with a brief description, and a table of contents so that you can preview the entire curriculum
- simply set up folders on your pc and download documents to preview, and to print

Inside the lessons, you will find:

1. title with description
2. Links Featured
3. downloads of the lesson's documents
4. a completion button for tracking
5. two (2) options to move to the next lesson

A few hints:

- the necessary software is Adobe Acrobat Free; you most likely have this software if you can presently open PDFs
- a smart board or large monitor is very helpful for there are videos embedded in the presentations with links to YouTube

- also the star icon within the presentations indicates a link to YouTube; video links will be found within the lesson plan, presentations and on that lesson's webpage under LINKS FEATURED
- when sharing a presentation, use your mouse or the up and down arrows on your keyboard to navigate

- reach us by commenting within the program, emailing info@LourdesVolunteers.org or calling 315-476-0026
